Index of Subjects

Abdominal fat
Self-reported waist circumference compared with the 'Waist Watcher' tape-measure to identify individuals at increased health risk through intra-abdominal fat accumulation
80, 81, 1998

Abetalipoproteinaemia
The assembly of triacylglycerol-rich lipoproteins: an essential role for the microsomal triacylglycerol transfer protein
80, 219, 1998

Absorption
A 3-month, double-blind, controlled trial of feeding with sucrose polyester in human volunteers
80, 41, 1998

Absorption of lycopene from single or daily portions of raw and processed tomato
80, 353, 1998

Acetylated peptides
Uptake of acetylated peptides from the small intestine in sheep and their nutritive value in rats
80, 101, 1998

Adipose tissue
Lipoprotein lipase and the disposition of dietary fatty acids
80, 495, 1998

Ageing
Nutrition, ageing and ill health
80, 7, 1998

Agrimony eupatoria
Actions of the traditional anti-diabetic plant, *Agrimony eupatoria* (agrimony): effects on hyperglycaemia, cellular glucose metabolism and insulin secretion
80, 109, 1998

Amino acids
The amino acid composition of human milk corrected for amino acid digestibility
80, 25, 1998

Transfers of N metabolites across the ovine liver in response to short-term infusions of an amino acid mixture into the mesenteric vein
80, 371, 1998

Effect of essential:total nitrogen ratio on protein utilization in the growing pig
80, 537, 1998

Animal model
The amino acid composition of human milk corrected for amino acid digestibility
80, 25, 1998

Antioxidants
Maternal and neonatal plasma antioxidant levels in normal pregnancy, and the relationship with fatty acid unsaturation
80, 67, 1998

Lutein ester in serum after lutein supplementation in human subjects
80, 445, 1998

Functional food science and defence against reactive oxidative species
80, S77, 1998

Apolipoproteins
The assembly of triacylglycerol-rich lipoproteins: an essential role for the microsomal triacylglycerol transfer protein
80, 219, 1998

Appetite
Dietary compensation in response to covert imposition of negative energy balance by removal of fat or carbohydrate
80, 141, 1998

A medium-term intervention study on the impact of high- and low-fat snacks varying in sweetness and fat content: large shifts in daily fat intake but good compensation for daily energy intake
80, 149, 1998

Atherosclerosis
Interactive effects of increased intake of saturated fat and cholesterol on atherosclerosis in the Japanese quail (*Coturnix japonica*)
80, 89, 1998

Comparison of the effects of fish oil and olive oil on blood lipids and aortic atherosclerosis in Watanabe heritable hyperlipidaemic rabbits
80, 565, 1998

Behaviour
Functional food science and behaviour and physiological functions
80, S173, 1998

Bifidobacteria
Prebiotics and synbiotics: concepts and nutritional properties
80, S197, 1998

Prevention of colon cancer by pre- and probiotics: evidence from laboratory studies
80, S219, 1998

Bioavailability
The bioavailability of α- and β-carotene is affected by gut microflora in the rat
80, 199, 1998

Biochemical markers
The effect of short-term calcium supplementation on biochemical markers of bone metabolism in healthy young adults
80, 437, 1998

Blood lipids
Replacement of linoleic acid with α-linolenic acid does not alter blood lipids in normolipidaemic men
80, 163, 1998

Effects of probiotics and prebiotics on blood lipids
80, S225, 1998

Bone
The effect of short-term calcium supplementation on biochemical markers of bone metabolism in healthy young adults
80, 437, 1998

Book reviews
Milk Composition, Production and Biotechnology
80, 213, 1998

Growth of farm animals
80, 213, 1998

Dietary Fiber in Health and Disease
80, 303, 1998

Caecum
Caecal fermentation and energy accumulation in the rat fed on indigestible oligosaccharides
80, 469, 1998

Calcium
The effect of short-term calcium supplementation on biochemical markers of bone metabolism in healthy young adults
80, 437, 1998

Carbohydrate intake
The effect of acute carbohydrate load on the monophasic or biphasic nature of the postprandial lipaemic response to acute fat ingestion in human subjects
80, 411, 1998

Carbohydrate tolerance
Effect of breakfast fat content on glucose tolerance and risk factors of atherosclerosis and thrombosis
80, 323, 1998

Carcass quality
Effects of L-carnitine supplementation of diets differing in energy levels on performance, abdominal fat content, and yield and composition of edible meat of broilers
80, 391, 1998

Cardiovascular disease
Functional food science and the cardiovascular system
80, S113, 1998

L-Carnitine
Effects of L-carnitine supplementation of diets differing in energy levels on performance, abdominal fat content, and yield and composition of edible meat of broilers
80, 391, 1998

Carotenoids
The bioavailability of α- and β-carotene is affected by gut microflora in the rat
80, 199, 1998

Lutein ester in serum after lutein supplementation in human subjects
80, 445, 1998

Chicory fructans
Prebiotics and synbiotics: concepts and nutritional properties
80, S197, 1998

Childhood
Vitamin A status does not influence neopterin production during illness or health in South African children
80, 75, 1998

Maternal reports of child illness and the biochemical status of the child: the use of morbidity interviews in rural Bangladesh
80, 451, 1998

Cholecystokinin
Physical state of meal affects gastric emptying, cholecystokinin release and satiety
80, 521, 1998

Cholesterol
A 3-month, double-blind, controlled trial of feeding with sucrose polyester in human volunteers
80, 41, 1998

Interactive effects of increased intake of saturated fat and cholesterol on atherosclerosis in the Japanese quail (*Coturnix japonica*)
80, 89, 1998

Cholesterol metabolism
The influence of enzyme-resistant starch on cholesterol metabolism in rats fed on a conventional diet
80, 193, 1998

Clinical outcome
Nutrition, ageing and ill health
80, 7, 1998

CO_2-stunning
Assessment of apparent ileal digestibility of amino acids and nitrogen in cottonseed and soyabean meals fed to pigs determined using ileal dissection under halothane anaesthesia or following carbon dioxide-stunning
80, 183, 1998

Colon cancer
Prevention of colon cancer by pre- and probiotics: evidence from laboratory studies
80, S219, 1998

Consumer choice
Take Five, a nutrition education intervention to increase fruit and vegetable intakes: impact on consumer choice and nutrient intakes
80, 123, 1998

Copper
Short-term ingestion of chlorogenic or caffeic acids decreases zinc but not copper absorption in rats, utilization of stable isotopes and inductively-coupled plasma mass spectrometry technique
80, 575, 1998

Corrigendum
Inadequate vitamin D status: does it contribute to the disorders comprising syndrome 'X'?
80, 585, 1998

Cottonseed meal
Assessment of apparent ileal digestibility of amino acids and nitrogen in cottonseed and soyabean meals fed to pigs determined using ileal dissection under halothane anaesthesia or following carbon dioxide-stunning
80, 183, 1998

Development
Development of macronutrient composition of very preterm human milk
80, 35, 1998

Growth, development and differentiation: a functional food science approach
80, S5, 1998

Diabetes
Actions of the traditional anti-diabetic plant, *Agrimony eupatoria* (agrimony): effects on hyperglycaemia, cellular glucose metabolism and insulin secretion
80, 109, 1998

Dietary fat
Effect of breakfast fat content on glucose tolerance and risk factors of atherosclerosis and thrombosis
80, 323, 1998

Functional food science and the cardiovascular system
80, S113, 1998

Dietary fatty acids
Lipoprotein lipase and the disposition of dietary fatty acids
80, 495, 1998

Dietary fibre
Accumulation of cadmium from wheat bran, sugar-beet fibre, carrots and cadmium chloride in the liver and kidneys of mice
80, 205, 1998

African plant foods rich in non-starch polysaccharides reduce postprandial blood glucose and insulin concentrations in healthy human subjects
80, 419, 1998

Intestinal degradation in pigs of rye dietary fibre with different structural characteristics
80, 457, 1998

Dietary intervention
Take Five, a nutrition education intervention to increase fruit and vegetable intakes: impact on attitudes towards dietary change
80, 133, 1998

Dietary targets
A medium-term intervention study on the impact of high- and low-fat snacks varying in sweetness and fat content: large shifts in daily fat intake but good compensation for daily energy intake
80, 149, 1998

Diet-induced thermogenesis
Effects of red pepper added to high-fat and high-carbohydrate meals on energy metabolism and substrate utilization in Japanese women
80, 503, 1998

Differentiation
Growth, development and differentiation: a functional food science approach
80, S5, 1998

Digestion
The amino acid composition of human milk corrected for amino acid digestibility
80, 25, 1998

Doubly-labelled water
Estimation of energy expenditure in free-living red deer (*Cervus elaphus*) with the doubly-labelled water method
80, 263, 1998

Editorial
An international vision of nutritional science
80, 1, 1998

Egg yolk
Comparison of egg-yolk protein hydrolysate and soyabean protein hydrolysate in terms of nitrogen utilization
80, 477, 1998

Elderly
Effect of dietary phytic acid on zinc absorption in the healthy elderly, as assessed by serum concentration curve tests
80, 177, 1998

Effects of 14 weeks of progressive endurance training on energy expenditure in elderly people
80, 511, 1998

Endurance training
Effects of 14 weeks of progressive endurance training on energy expenditure in elderly people
80, 511, 1998

Energy contribution
Caecal fermentation and energy accumulation in the rat fed on indigestible oligosaccharides
80, 469, 1998

Energy expenditure
A quantitative analysis of the relationship between habitual energy expenditure, fitness and the metabolic cardiovascular syndrome
80, 235, 1998

Estimation of energy expenditure in free-living red deer (*Cervus elaphus*) with the doubly-labelled water method
80, 263, 1998

Effects of 14 weeks of progressive endurance training on energy expenditure in elderly people
80, 511, 1998

Energy intake
Dietary compensation in response to covert imposition of negative energy balance by removal of fat or carbohydrate
80, 141, 1998

A medium-term intervention study on the impact of high- and low-fat snacks varying in sweetness and fat content: large shifts in daily fat intake but good compensation for daily energy intake
80, 149, 1998

Enteral nutrition
Comparison of absorption of nutrients and secretion of water between oligomeric and polymeric enteral diets in pigs
80, 545, 1998

Exercise
The effect of 13 weeks of running training followed by 9 d of detraining on postprandial lipaemia
80, 57, 1998

Fat intake
A medium-term intervention study on the impact of high- and low-fat snacks varying in sweetness and fat content: large shifts in daily fat intake but good compensation for daily energy intake
80, 149, 1998

The effect of acute carbohydrate load on the monophasic or biphasic nature of the postprandial lipaemic response to acute fat ingestion in human subjects
80, 411, 1998

Fatty acids
Maternal and neonatal plasma antioxidant levels in normal pregnancy, and the relationship with fatty acid unsaturation
80, 67, 1998

Fermentation
Fermentation of non-starch polysaccharides in mixed diets and single fibre sources: comparative studies in human subjects and *in vitro*
80, 253, 1998

Intestinal degradation in pigs of rye dietary fibre with different structural characteristics
80, 457, 1998

Caecal fermentation and energy accumulation in the rat fed on indigestible oligosaccharides
80, 469, 1998

Dietary modulation of the human gut microflora using probiotics
80, S209, 1998

Fish nutrition
Dietary fish oil and digestible protein modify susceptibility to lipid peroxidation in the muscle of rainbow trout (*Oncorhynchus mykiss*) and sea bass (*Dicentrarchus labrax*)
80, 281, 1998

Fish oil
Effect on plasma lipids and lipoproteins of replacing partially hydrogenated fish oil with vegetable fat in margarine
80, 243, 1998

Comparison of the effects of fish oil and olive oil on blood lipids and aortic atherosclerosis in Watanabe heritable hyperlipidaemic rabbits
80, 565, 1998

Fitness
A quantitative analysis of the relationship between habitual energy expenditure, fitness and the metabolic cardiovascular syndrome
80, 235, 1998

Food consistency
Physical state of meal affects gastric emptying, cholecystokinin release and satiety
80, 521, 1998

Fructo-oligosaccharides
Prebiotics and synbiotics: concepts and nutritional properties
80, S197, 1998

Fructose
Acute effect of fructose on postprandial lipaemia in diabetic and non-diabetic subjects
80, 169, 1998

Fruit consumption
Take Five, a nutrition education intervention to increase fruit and vegetable intakes: impact on consumer choice and nutrient intakes
80, 123, 1998
Take Five, a nutrition education intervention to increase fruit and vegetable intakes: impact on attitudes towards dietary change
80, 133, 1998

Functional foods
Functional food science in Europe. Preface.
80, S1, 1998
Functional food science in Europe. Foreword.
80, S3, 1998
Growth, development and differentiation: a functional food science approach
80, S5, 1998
Functional food science and substrate metabolism
80, S47, 1998
Functional food science and defence against reactive oxidative species
80, S77, 1998
Functional food science and the cardiovascular system
80, S113, 1998
Functional food science and gastrointestinal physiology and function
80, S147, 1998
Functional food science and behaviour and physiological functions
80, S173, 1998
Development of consumer probiotics for the US market
80, S213, 1998
European market development in prebiotic- and probiotic-containing foodstuffs
80, S231, 1998

Gastric emptying
Physical state of meal affects gastric emptying, cholecystokinin release and satiety
80, 521, 1998

Gastrointestinal function
Functional food science and gastrointestinal physiology and function
80, S147, 1998

Gastrointestinal tract
Passage through the rumen and the large intestine of sheep estimated from faecal marker excretion curves and slaughter trials
80, 381, 1998

Gene expression
Regulatory signals in messenger RNA: determinants of nutrient–gene interaction and metabolic compartmentation
80, 307, 1998

Glucose homeostasis
Protein deficiency during pregnancy and lactation impairs glucose-induced insulin secretion but increases the sensitivity to insulin in weaned rats
80, 291, 1998

Glycine
Infants in Trinidad excrete more 5-L-oxoproline (L-pyroglutamic acid) in urine than infants in England: an environmental not ethnic difference
80, 51, 1998

Gnotobiology
Effects of the bacterial status of rats on the changes in some liver cytochrome P450 (*EC* 1.14.14.1) apoproteins consequent to a glucosinolate-rich diet (Short communication)
80, 231, 1998

Growth
Infants in Trinidad excrete more 5-L-oxoproline (L-pyroglutamic acid) in urine than infants in England: an environmental not ethnic difference
80, 51, 1998
Effects of L-carnitine supplementation of diets differing in energy levels on performance, abdominal fat content, and yield and composition of edible meat of broilers
80, 391, 1998
Growth, development and differentiation: a functional food science approach
80, S5, 1998

Guinea-pig
The effects of maternal intake and gestational age on maternofetal transport of vitamin C in the guinea-pig
80, 485, 1998

Gut microflora
Prebiotics and synbiotics: concepts and nutritional properties
80, S197, 1998
The bioavailability of α- and β-carotene is affected by gut microflora in the rat
80, 199, 1998
Dietary modulation of the human gut microflora using probiotics
80, S209, 1998

Health benefits
Health benefits for probiotics
80, S203, 1998

Health promotion
Self-reported waist circumference compared with the 'Waist Watcher' tape-measure to identify individuals at increased health risk through intra-abdominal fat accumulation
80, 81, 1998

Homeostasis
Dietary compensation in response to covert imposition of negative energy balance by removal of fat or carbohydrate
80, 141, 1998

Human milk
The amino acid composition of human milk corrected for amino acid digestibility
80, 25, 1998
Development of macronutrient composition of very preterm human milk
80, 35, 1998

Hydrogenated fat
Effect on plasma lipids and lipoproteins of replacing partially hydrogenated fish oil with vegetable fat in margarine
80, 243, 1998

Ileal digestibility
Assessment of apparent ileal digestibility of amino acids and nitrogen in cottonseed and soyabean meals fed to pigs determined using ileal dissection under halothane anaesthesia or following carbon dioxide-stunning
80, 183, 1998

Ill health
Nutrition, ageing and ill health
80, 7, 1998

Immune system
Functional food science and gastrointestinal physiology and function
80, S147, 1998

Indirect calorimetry
Net energy value of non-starch polysaccharide isolates (sugar-beet fibre and commercial inulin) and their impact on nutrient digestive utilization in healthy human subjects
80, 343, 1998

Inositol phosphates
Accumulation of cadmium from wheat bran, sugar-beet fibre, carrots and cadmium chloride in the liver and kidneys of mice
80, 205, 1998

Insulin
Actions of the traditional anti-diabetic plant, *Agrimony eupatoria* (agrimony): effects on hyperglycaemia, cellular glucose metabolism and insulin secretion
80, 109, 1998

Protein deficiency during pregnancy and lactation impairs glucose-induced insulin secretion but increases the sensitivity to insulin in weaned rats
80, 291, 1998

Effect of breakfast fat content on glucose tolerance and risk factors of atherosclerosis and thrombosis
80, 323, 1998

Interferon
Vitamin A status does not influence neopterin production during illness or health in South African children
80, 75, 1998

Intestinal absorption
Accumulation of cadmium from wheat bran, sugar-beet fibre, carrots and cadmium chloride in the liver and kidneys of mice
80, 205, 1998

Inulin
Net energy value of non-starch polysaccharide isolates (sugar-beet fibre and commercial inulin) and their impact on nutrient digestive utilization in healthy human subjects
80, 343, 1998

Prevention of colon cancer by pre- and probiotics: evidence from laboratory studies
80, S219, 1998

Invited commentary
Regulation of energy and fat intakes and body weight: the role of fat substitutes

***In vitro* batch system**
Fermentation of non-starch polysaccharides in mixed diets and single fibre sources: comparative studies in human subjects and *in vitro*
80, 253, 1998

Iodine
Iodine intake and iodine deficiency in vegans as assessed by the duplicate-portion technique and urinary iodine excretion
80, 529, 1998

Isotope technique
Short-term ingestion of chlorogenic or caffeic acids decreases zinc but not copper absorption in rats, utilization of stable isotopes and inductively-coupled plasma mass spectrometry technique
80, 575, 1998

Italian diet
Resistant starch in the Italian diet
80, 333, 1998

Japanese quail (*Coturnix japonica*)
Interactive effects of increased intake of saturated fat and cholesterol on atherosclerosis in the Japanese quail (*Coturnix japonica*)
80, 89, 1998

Kinetics
A comparison of the short-term kinetics of zinc metabolism in women during fasting and following a breakfast meal
80, 363, 1998

Lactobacilli
Health benefits for probiotics
80, S203, 1998

Development of consumer probiotics for the US market
80, S213, 1998

Linoleic acid
Replacement of linoleic acid with α-linolenic acid does not alter blood lipids in normolipidaemic men
80, 163, 1998

α-Linolenic acid
Replacement of linoleic acid with α-linolenic acid does not alter blood lipids in normolipidaemic men
80, 163, 1998

Linseed oil
Replacement of linoleic acid with α-linolenic acid does not alter blood lipids in normolipidaemic men
80, 163, 1998

Lipid oxidation
Effects of red pepper added to high-fat and high-carbohydrate meals on energy metabolism and substrate utilization in Japanese women
80, 503, 1998

Lipid peroxidation
Dietary fish oil and digestible protein modify susceptibility to lipid peroxidation in the muscle of rainbow trout (*Oncorhynchus mykiss*) and sea bass (*Dicentrarchus labrax*)
80, 281, 1998

Lipoprotein lipase
Lipoprotein lipase and the disposition of dietary fatty acids
80, 495, 1998

Lipoproteins
Interactive effects of increased intake of saturated fat and cholesterol on atherosclerosis in the Japanese quail (*Coturnix japonica*)
80, 89, 1998

The assembly of triacylglycerol-rich lipoproteins: an essential role for the microsomal triacylglycerol transfer protein
80, 219, 1998

Lutein
Lutein ester in serum after lutein supplementation in human subjects
80, 445, 1998

Lycopene
Absorption of lycopene from single or daily portions of raw and processed tomato
80, 353, 1998

Mastication
Physical and chemical transformations of cereal food during oral digestion in human subjects
80, 429, 1998

Materno-fetal transport
The effects of maternal intake and gestational age on materno-fetal transport of vitamin C in the guinea-pig
80, 485, 1998

Mental state
Functional food science and behaviour and physiological functions
80, S173, 1998

Metabolic cardiovascular syndrome
A quantitative analysis of the relationship between habitual energy expenditure, fitness and the metabolic cardiovascular syndrome
80, 235, 1998

Metabolizable energy
Effects of L-carnitine supplementation of diets differing in energy levels on performance, abdominal fat content, and yield and composition of edible meat of broilers
80, 391, 1998

Microflora
Functional food science and gastrointestinal physiology and function
80, S147, 1998

Microsomal triacylglycerol transfer protein
The assembly of triacylglycerol-rich lipoproteins: an essential role for the microsomal triacylglycerol transfer protein
80, 219, 1998

Mink (*Mustela vison*)
Water intake and excretion, urinary solute excretion and some stress indicators in mink (*Mustela vison*): effect of ambient temperature and quantitative water supply to lactating females
80, 555, 1998

Mood
Functional food science and behaviour and physiological functions
80, S173, 1998

Morbidity interviews
Maternal reports of child illness and the biochemical status of the child: the use of morbidity interviews in rural Bangladesh
80, 451, 1998

Muscle
Dietary fish oil and digestible protein modify susceptibility to lipid peroxidation in the muscle of rainbow trout (*Oncorhynchus mykiss*) and sea bass (*Dicentrarchus labrax*)
80, 281, 1998

Neopterin
Vitamin A status does not influence neopterin production during illness or health in South African children
80, 75, 1998

Nitrogen metabolism
Transfers of N metabolites across the ovine liver in response to short-term infusions of an amino acid mixture into the mesenteric vein
80, 371, 1998

Comparison of egg-yolk protein hydrolysate and soyabean protein hydrolysate in terms of nitrogen utilization
80, 477, 1998

Non-insulin-dependent diabetes mellitus
Acute effect of fructose on postprandial lipaemia in diabetic and non-diabetic subjects
80, 169, 1998

Non-starch polysaccharides
Fermentation of non-starch polysaccharides in mixed diets and single fibre sources: comparative studies in human subjects and *in vitro*
80, 253, 1998

Net energy value of non-starch polysaccharide isolates (sugarbeet fibre and commercial inulin) and their impact on nutrient digestive utilization in healthy human subjects
80, 343, 1998

African plant foods rich in non-starch polysaccharides reduce postprandial blood glucose and insulin concentrations in healthy human subjects
80, 419, 1998

Nutrient hydrolysis
Comparison of absorption of nutrients and secretion of water between oligomeric and polymeric enteral diets in pigs
80, 545, 1998

Nutrient intake
Take Five, a nutrition education intervention to increase fruit and vegetable intakes: impact on consumer choice and nutrient intakes
80, 123, 1998

Nutrition Discussion Forum
Intestinal absorption of β-carotene, lycopene and lutein in men and women following a standard meal
80, 115, 1998

Intestinal absorption of β-carotene, lycopene and lutein in men and women following a standard meal (Reply)
80, 115, 1998

Clarification of the link between polyunsaturated fatty acids and *Helicobacter pylori*-associated duodenal ulcer disease: a dietary intervention study
80, 116, 1998

Clarification of the link between polyunsaturated fatty acids and *Helicobacter pylori*-associated duodenal ulcer disease: a dietary intervention study (Reply)
80, 116, 1998

Dietary lipids and evolution of the human brain
80, 299, 1998

Dietary lipids and evolution of the human brain (Reply)
80, 299, 1998

Dietary lipids and evolution of the human brain
80, 301, 1998

Dietary lipids and evolution of the human brain (Reply)
80, 301, 1998

Nutritional intervention
Take Five, a nutrition education intervention to increase fruit and vegetable intakes: impact on consumer choice and nutrient intakes
80, 123, 1998

Nutritional status
Maternal reports of child illness and the biochemical status of the child: the use of morbidity interviews in rural Bangladesh
80, 451, 1998

Nutritive value
Uptake of acetylated peptides from the small intestine in sheep and their nutritive value in rats
80, 101, 1998

Oligofructose
Prevention of colon cancer by pre- and probiotics: evidence from laboratory studies
80, S219, 1998

Oligosaccharides
Caecal fermentation and energy accumulation in the rat fed on indigestible oligosaccharides
80, 469, 1998

Olive oil
Comparison of the effects of fish oil and olive oil on blood lipids and aortic atherosclerosis in Watanabe heritable hyperlipidaemic rabbits
80, 565, 1998

Oral digestion
Physical and chemical transformations of cereal food during oral digestion in human subjects
80, 429, 1998

Osmolality
Comparison of absorption of nutrients and secretion of water between oligomeric and polymeric enteral diets in pigs
80, 545, 1998

Oxidative damage
Functional food science and defence against reactive oxidative species
80, S77, 1998

5-L-Oxoproline
Infants in Trinidad excrete more 5-L-oxoproline (L-pyroglutamic acid) in urine than infants in England: an environmental not ethnic difference
80, 51, 1998

Palatability
Effects of red pepper added to high-fat and high-carbohydrate meals on energy metabolism and substrate utilization in Japanese women
80, 503, 1998

Physical activity
A quantitative analysis of the relationship between habitual energy expenditure, fitness and the metabolic cardiovascular syndrome
80, 235, 1998

Functional food science and substrate metabolism
80, S47, 1998

Phytic acid
Effect of dietary phytic acid on zinc absorption in the healthy elderly, as assessed by serum concentration curve tests
80, 177, 1998

Pigs
Effect of essential:total nitrogen ratio on protein utilization in the growing pig
80, 537, 1998

Plasma lipoproteins
Effect on plasma lipids and lipoproteins of replacing partially hydrogenated fish oil with vegetable fat in margarine
80, 243, 1998

Plasma protein synthesis
Transfers of N metabolites across the ovine liver in response to short-term infusions of an amino acid mixture into the mesenteric vein
80, 371, 1998

Polyphenols
Short-term ingestion of chlorogenic or caffeic acids decreases zinc but not copper absorption in rats, utilization of stable isotopes and inductively-coupled plasma mass spectrometry technique
80, 575, 1998

Portal-drained viscera
Transfers of N metabolites across the ovine liver in response to short-term infusions of an amino acid mixture into the mesenteric vein
80, 371, 1998

Postprandial lipaemia
Acute effect of fructose on postprandial lipaemia in diabetic and non-diabetic subjects
80, 169, 1998

Postprandial metabolism
The effect of 13 weeks of running training followed by 9 d of detraining on postprandial lipaemia
80, 57, 1998

A comparison of the short-term kinetics of zinc metabolism in women during fasting and following a breakfast meal
80, 363, 1998

The effect of acute carbohydrate load on the monophasic or biphasic nature of the postprandial lipaemic response to acute fat ingestion in human subjects
80, 411, 1998

African plant foods rich in non-starch polysaccharides reduce postprandial blood glucose and insulin concentrations in healthy human subjects
80, 419, 1998

Post-transcriptional regulation
Regulatory signals in messenger RNA: determinants of nutrient–gene interaction and metabolic compartmentation
80, 307, 1998

Prebiotics
Pre- and probiotics: Where are we today? Foreword
80, S195, 1998

Prebiotics and synbiotics: concepts and nutritional properties
80, S197, 1998

Dietary modulation of the human gut microflora using probiotics
80, S209, 1998

Effects of probiotics and prebiotics on blood lipids
80, S225, 1998

European market development in prebiotic- and probiotic-containing foodstuffs
80, S231, 1998

Pregnancy
Maternal and neonatal plasma antioxidant levels in normal pregnancy, and the relationship with fatty acid unsaturation
80, 67, 1998

Effect of feeding tuna oil or soyabean oil as supplements to sows in late pregnancy on piglet tissue composition and viability
80, 273, 1998

Preterm infant
Development of macronutrient composition of very preterm human milk
80, 35, 1998

Probiotics
Pre- and probiotics: Where are we today? Foreword
80, S195, 1998

Health benefits of probiotics
80, S203, 1998

Effects of probiotics and prebiotics on blood lipids
80, S225, 1998

Development of consumer probiotics for the US market
80, S213, 1998

European market development in prebiotic- and probiotic-containing foodstuffs
80, S231, 1998

Pro-oxidants
Functional food science and defence against reactive oxidative species
80, S77, 1998

Protein malnutrition
Protein deficiency during pregnancy and lactation impairs glucose-induced insulin secretion but increases the sensitivity to insulin in weaned rats
80, 291, 1998

Protein utilization
Effect of essential:total nitrogen ratio on protein utilization in the growing pig
80, 537, 1998

Rapeseed
Effects of the bacterial status of rats on the changes in some liver cytochrome P450 (*EC* 1.14.14.1) apoproteins consequent to a glucosinolate-rich diet (Short communication)
80, 231, 1998

Rate of passage
Passage through the rumen and the large intestine of sheep estimated from faecal marker excretion curves and slaughter trials
80, 381, 1998

Red deer (*Cervus elaphus*)
Estimation of energy expenditure in free-living red deer (*Cervus elaphus*) with the doubly-labelled water method
80, 263, 1998

Red pepper
Effects of red pepper added to high-fat and high-carbohydrate meals on energy metabolism and substrate utilization in Japanese women
80, 503, 1998

Resistant starch
The influence of enzyme-resistant starch on cholesterol metabolism in rats fed on a conventional diet
80, 193, 1998

Resistant starch in the Italian diet
80, 333, 1998

Rye
Intestinal degradation in pigs of rye dietary fibre with different structural characteristics
80, 457, 1998

Salivary amylase
Physical and chemical transformations of cereal food during oral digestion in human subjects
80, 429, 1998

Satiety
Physical state of meal affects gastric emptying, cholecystokinin release and satiety
80, 521, 1998

Short communication
Effects of the bacterial status of rats on the changes in some liver cytochrome P450 (*EC* 1.14.14.1) apoproteins consequent to a glucosinolate-rich diet
80, 231, 1998

Skeletal muscle
Lipoprotein lipase and the disposition of dietary fatty acids
80, 495, 1998

Small intestine
Uptake of acetylated peptides from the small intestine in sheep and their nutritive value in rats
80, 101, 1998

Vitamin A deficiency induces morphometric changes and decreased functionality in chicken small intestine
80, 401, 1998

Snacking
A medium-term intervention study on the impact of high- and low-fat snacks varying in sweetness and fat content: large shifts in daily fat intake but good compensation for daily energy intake
80, 149, 1998

Soyabean meal
Assessment of apparent ileal digestibility of amino acids and nitrogen in cottonseed and soyabean meals fed to pigs determined using ileal dissection under halothane anaesthesia or following carbon dioxide-stunning
80, 183, 1998

Soyabean protein
Comparison of egg-yolk protein hydrolysate and soyabean protein hydrolysate in terms of nitrogen utilization
80, 477, 1998

Starch
Physical and chemical transformations of cereal food during oral digestion in human subjects
80, 429, 1998

Stress
Water intake and excretion, urinary solute excretion and some stress indicators in mink (*Mustela vison*): effect of ambient temperature and quantitative water supply to lactating females
80, 555, 1998

Substrate metabolism
Functional food science and substrate metabolism
80, S47, 1998

Sucrose polyester
A 3-month, double-blind, controlled trial of feeding with sucrose polyester in human volunteers
80, 41, 1998

Sugarbeet fibre
Net energy value of non-starch polysaccharide isolates (sugarbeet fibre and commercial inulin) and their impact on nutrient digestive utilization in healthy human subjects
80, 343, 1998

Synbiotics
Prebiotics and synbiotics: concepts and nutritional properties
80, S197, 1998

Tissue fatty acids
Effect of feeding tuna oil or soyabean oil as supplements to sows in late pregnancy on piglet tissue composition and viability
80, 273, 1998

Tomato
Absorption of lycopene from single or daily portions of raw and processed tomato
80, 353, 1998

Trace elements
Accumulation of cadmium from wheat bran, sugar-beet fibre, carrots and cadmium chloride in the liver and kidneys of mice
80, 205, 1998

Traditional plant therapies
Actions of the traditional anti-diabetic plant, *Agrimony eupatoria* (agrimony): effects on hyperglycaemia, cellular glucose metabolism and insulin secretion
80, 109, 1998

***Trans* fatty acids**
Effect on plasma lipids and lipoproteins of replacing partially hydrogenated fish oil with vegetable fat in margarine
80, 243, 1998

Triacylglycerols
The effect of 13 weeks of running training followed by 9 d of detraining on postprandial lipaemia
80, 57, 1998
The assembly of triacylglycerol-rich lipoproteins: an essential role for the microsomal triacylglycerol transfer protein
80, 219, 1998

Tuna oil
Effect of feeding tuna oil or soyabean oil as supplements to sows in late pregnancy on piglet tissue composition and viability
80, 273, 1998

Untranslated regions
Regulatory signals in messenger RNA: determinants of nutrient–gene interaction and metabolic compartmentation
80, 307, 1998

Urinary electrolytes
Water intake and excretion, urinary solute excretion and some stress indicators in mink (*Mustela vison*): effect of ambient temperature and quantitative water supply to lactating females
80, 555, 1998

Vegans
Iodine intake and iodine deficiency in vegans as assessed by the duplicate-portion technique and urinary iodine excretion
80, 529, 1998

Vegetable consumption
Take Five, a nutrition education intervention to increase fruit and vegetable intakes: impact on consumer choice and nutrient intakes
80, 123, 1998
Take Five, a nutrition education intervention to increase fruit and vegetable intakes: impact on attitudes towards dietary change
80, 133, 1998

Vitamin A
Vitamin A status does not influence neopterin production during illness or health in South African children
80, 75, 1998
The bioavailability of α- and β-carotene is affected by gut microflora in the rat
80, 199, 1998
Vitamin A deficiency induces morphometric changes and decreased functionality in chicken small intestine
80, 401, 1998

Vitamin C
The effects of maternal intake and gestational age on materno-fetal transport of vitamin C in the guinea-pig
80, 485, 1998

Waist circumference
Self-reported waist circumference compared with the 'Waist Watcher' tape-measure to identify individuals at increased health risk through intra-abdominal fat accumulation
80, 81, 1998

Water balance
Water intake and excretion, urinary solute excretion and some stress indicators in mink (*Mustela vison*): effect of ambient temperature and quantitative water supply to lactating females
80, 555, 1998

WHHL rabbit
Comparison of the effects of fish oil and olive oil on blood lipids and aortic atherosclerosis in Watanabe heritable hyperlipidaemic rabbits
80, 565, 1998

Whole-body calorimetry
Dietary compensation in response to covert imposition of negative energy balance by removal of fat or carbohydrate
80, 141, 1998

Xenobiotic metabolizing enzymes
Effects of the bacterial status of rats on the changes in some liver cytochrome P450 (*EC* 1.14.14.1) apoproteins consequent to a glucosinolate-rich diet (Short communication)
80, 231, 1998

Young adults
The effect of short-term calcium supplementation on biochemical markers of bone metabolism in healthy young adults
80, 437, 1998

Zinc
Effect of dietary phytic acid on zinc absorption in the healthy elderly, as assessed by serum concentration curve tests
80, 177, 1998
A comparison of the short-term kinetics of zinc metabolism in women during fasting and following a breakfast meal
80, 363, 1998
Short-term ingestion of chlorogenic or caffeic acids decreases zinc but not copper absorption in rats, utilization of stable isotopes and inductively-coupled plasma mass spectrometry technique
80, 575, 1998
